# Named Entity Recognition

Citing high fuel prices, [ORG United Airlines] said [TIME Friday] it has increased fares by [MONEY \$6] per round trip on flights to some cities also served by lower-cost carriers. [ORG American Airlines], a unit of [ORG AMR Corp.], immediately matched the move, spokesman [PER Tim Wagner] said. [ORG United], a unit of [ORG UAL Corp.], said the increase took effect [TIME Thursday] and applies to most routes where it competes against discount carriers, such as [LOC Chicago] to [LOC Dallas] and [LOC Denver] to [LOC San Francisco].

Type	Tag	Sample Categories	Example sentences
People	PER	people, characters	Turing is a giant of computer science.
Organization	ORG	companies, sports teams	The IPCC warned about the cyclone.
Location	LOC	regions, mountains, seas	The Mt. Sanitas loop is in Sunshine Canyon.
Geo-Political Entity	GPE	countries, states, provinces	Palo Alto is raising the fees for parking.
Facility	FAC	bridges, buildings, airports	Consider the Tappan Zee Bridge.
Vehicles	VEH	planes, trains, automobiles	It was a classic Ford Falcon.

# Category Ambiguity in NER

Name	Possible Categories
<i>Washington</i>	Person, Location, Political Entity, Organization, Vehicle
<i>Downing St.</i>	Location, Organization
<i>IRA</i>	Person, Organization, Monetary Instrument
<i>Louis Vuitton</i>	Person, Organization, Commercial Product

Examples of type ambiguities in the use of the name *Washington*:

[PER Washington] was born into slavery on the farm of James Burroughs.

[ORG Washington] went up 2 games to 1 in the four-game series.

Blair arrived in [LOC Washington] for what may well be his last state visit.

In June, [GPE Washington] passed a primary seatbelt law.

The [VEH Washington] had proved to be a leaky ship, every passage I made...

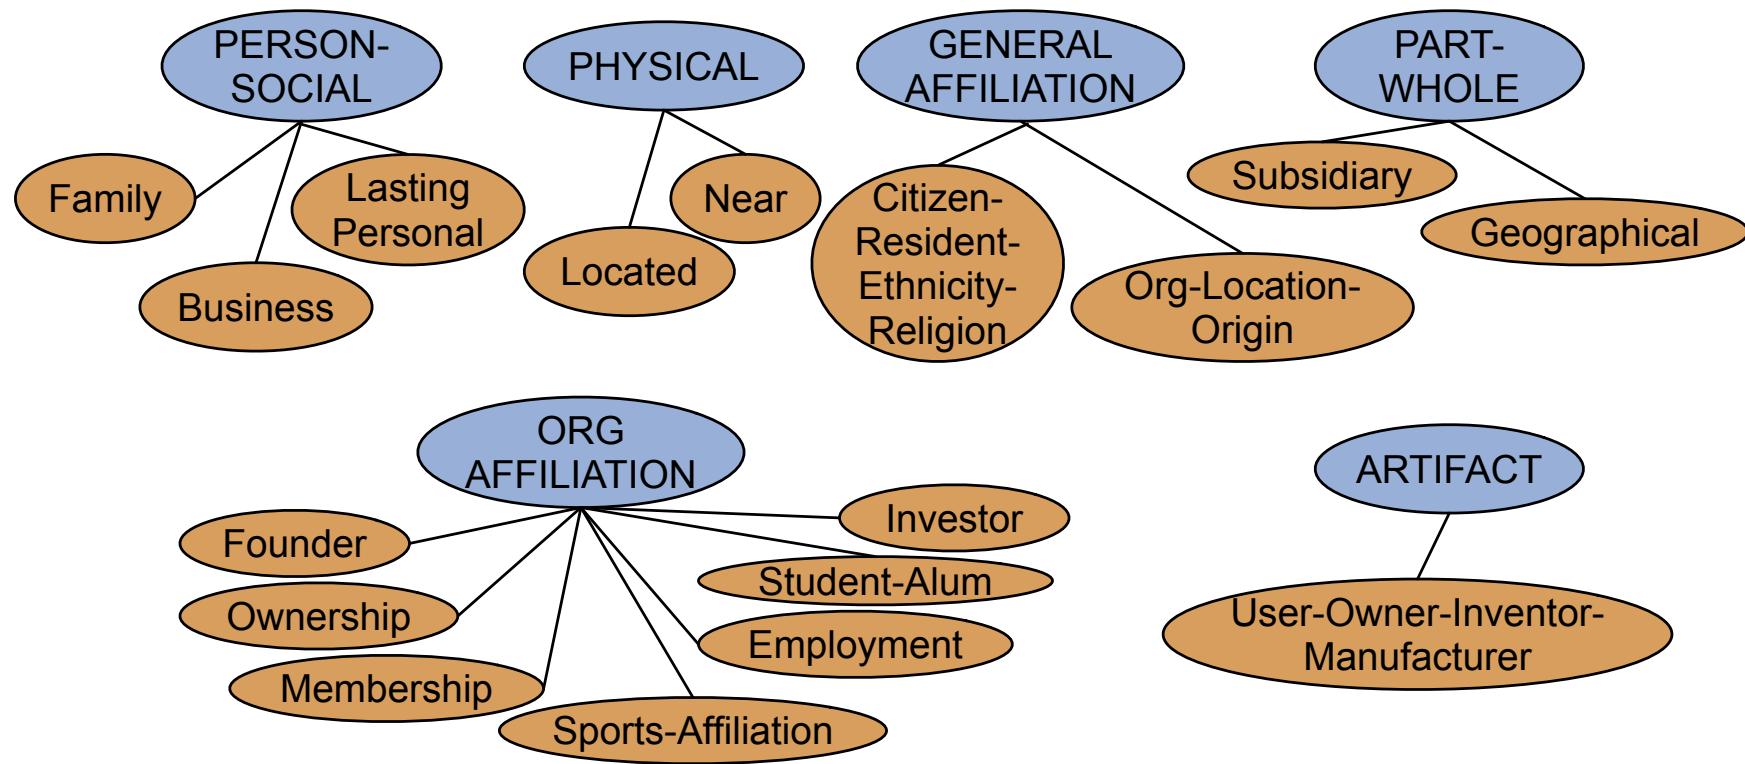

# Relation Extraction

Citing high fuel prices, [ORG United Airlines] said [TIME Friday] it has increased fares by [MONEY \$6] per round trip on flights to some cities also served by lower-cost carriers. The semantic web, 722-735

DBpedia is a community effort to extract structured information from Wikipedia and to make this information available on the Web. DBpedia allows you to ask sophisticated queries against datasets derived from Wikipedia and to link other datasets on the Web to Wikipedia data. We describe the extraction of the DBpedia datasets, and how the resulting information is published on the Web for human-and machine-consumption. We describe some emerging applications from the DBpedia community and show how website authors can facilitate DBpedia content within their sites. Finally, we present the current status of interlinking DBpedia with other open datasets on the Web and outline how DBpedia could serve as a nucleus for an emerging Web of open data.

# Freebase, WordNet, other ontologies

# Strategies for relation extraction

- hand-written patterns
- supervised machine learning
- semi-supervised machine learning
- unsupervised machine learning

# Hearst Patterns

Agar is a substance prepared from a mixture of red algae, such as Gelidium, for laboratory or industrial use.

She suggests that the following **lexico-syntactic pattern**

$$NP_0 \text{ such as } NP_1 \{ , NP_2 \dots, (\text{and}|\text{or}) NP_i \}, i \geq 1$$

implies the following semantics

$$\forall NP_i, i \geq 1, \text{hyponym}(NP_i, NP_0)$$

allowing us to infer

$$\text{hyponym}(\text{Gelidium}, \text{red algae})$$

NP {, NP}* {,} (and or) other NP <sub>H</sub>	temples, treasuries, and other important <b>civic buildings</b>
NP <sub>H</sub> such as {NP,}* { (or and)} NP	red algae such as Gelidium
such NP <sub>H</sub> as {NP,}* { (or and)} NP	such <b>authors</b> as Herrick, Goldsmith, and Shakespeare
NP <sub>H</sub> {,} including {NP,}* { (or and)} NP	<b>common-law countries</b> , including Canada and England
NP <sub>H</sub> {,} especially {NP,}* { (or and)} NP	European countries, especially France, England, and Spain

# Machine learning techniques

- Supervised: training corpus annotated with manually annotated with fixed set of relations and entities
- Semi-supervised: high-precision seed patterns, or seed tuples, are used to bootstrap more examples
- Distant supervision: start with a huge number of seeds, learn noisy pattern fields (e.g. 100k examples of birth-place-of from infoboxes, help learn the corresponding text patterns)

# Open IE

- Unsupervised relation extraction
- Find all *strings of words* that satisfy the triple relation.

United has a hub in Chicago, which is the headquarters of United Continental Holdings.

r1: <United, has a hub in, Chicago>

r2: <Chicago, is the headquarters of, United Continental Holdings>

# Temporal Expression Extraction

Absolute	Relative	Durations
April 24, 1916	yesterday	four hours
The summer of '77	next semester	three weeks
10:15 AM	two weeks from yesterday	six days
The 3rd quarter of 2006	last quarter	the last three quarters

## Lexical triggers for temporal expressions:

Category	Examples
Noun	<i>morning, noon, night, winter, dusk, dawn</i>
Proper Noun	<i>January, Monday, Ides, Easter, Rosh Hashana, Ramadan, Tet</i>
Adjective	<i>recent, past, annual, former</i>
Adverb	<i>hourly, daily, monthly, yearly</i>

# Event Extraction

[EVENT Citing] high fuel prices, United Airlines [EVENT said] Friday it has [EVENT increased] fares by \$6 per round trip on flights to some cities also served by lower-cost carriers. American Airlines, a unit of AMR Corp., immediately [EVENT matched] [EVENT the move], spokesman Tim Wagner [EVENT said]. United, a unit of UAL Corp., [EVENT said] [EVENT the increase] took effect Thursday and [EVENT applies] to most routes where it [EVENT competes] against discount carriers, such as Chicago to Dallas and Denver to San Francisco.

In English events are typically expressed verbs

# Temporal ordering of events

Delta Air Lines earnings soared 33% to a record in the fiscal first quarter, bucking the industry trend toward declining profits.

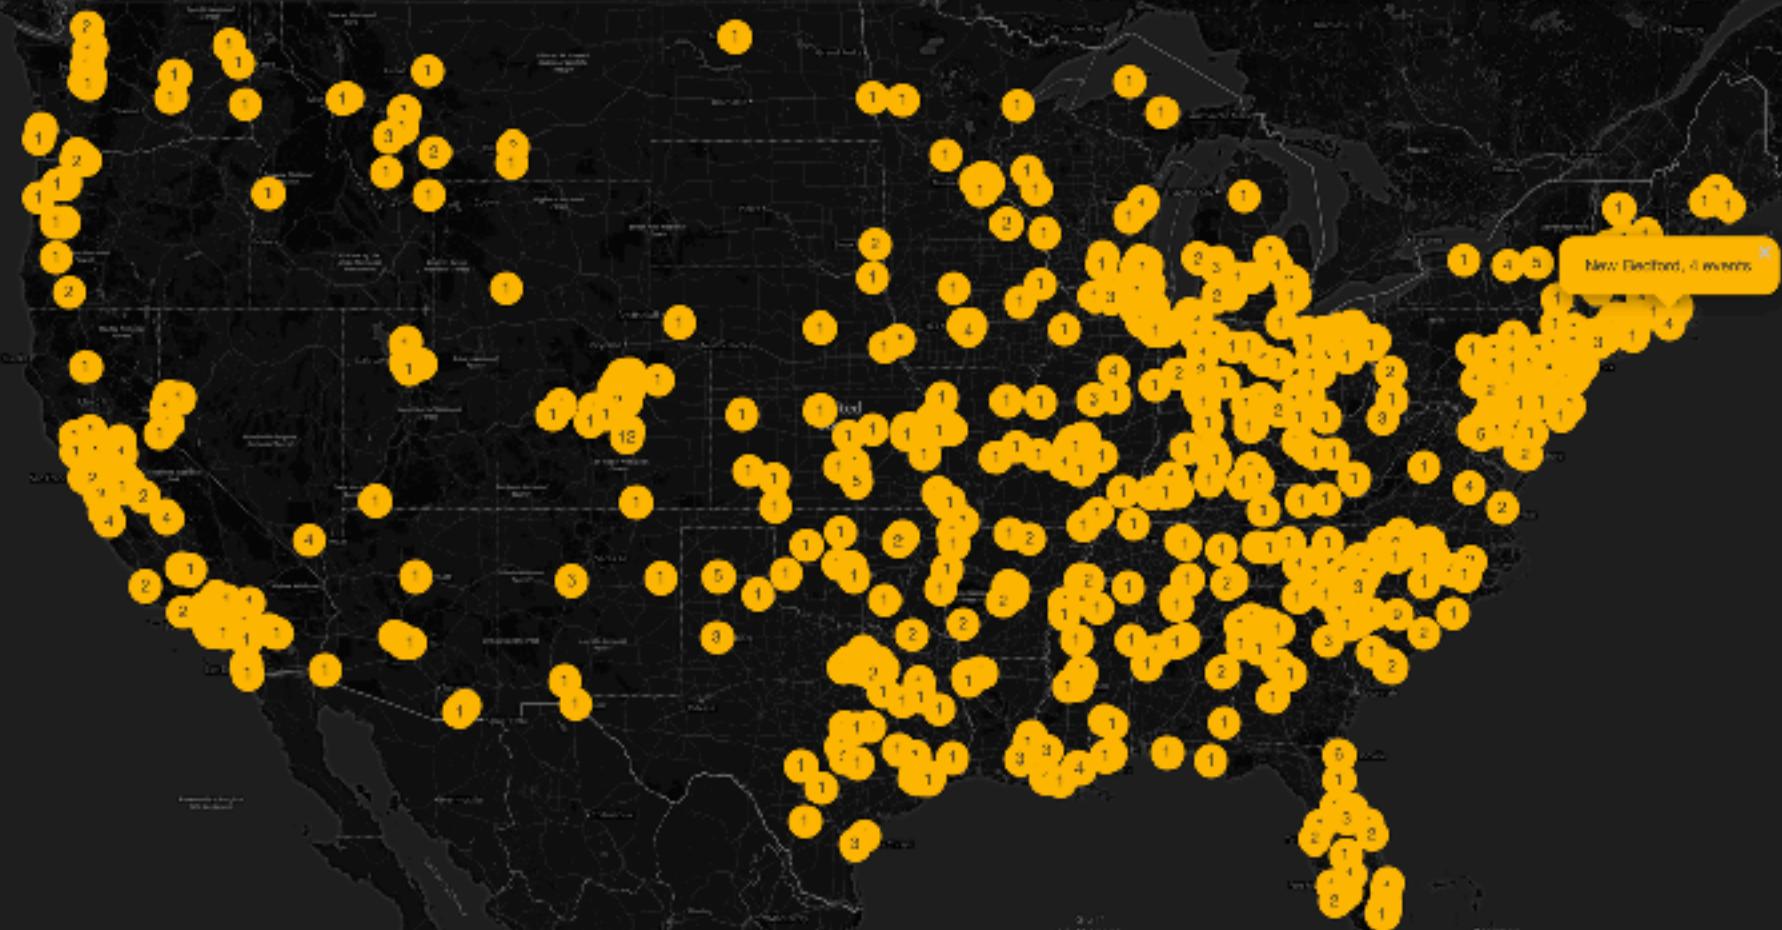

- Soaring<sub>e1</sub> is **included** in the fiscal first quarter<sub>t58</sub>
- Soaring<sub>e1</sub> is **simultaneous** with the bucking<sub>e3</sub>
- Declining<sub>e4</sub> **includes** soaring<sub>e1</sub>

# Template Filling

- Scripts are common, stereotypical situations
- Templates represent scripts with a fixed set of slots that take slot-filler values

# The Gun Violence Database

Ellie Pavlick and Chris Callison-Burch  
University of Pennsylvania

# Goals of the GVDB

Collect data about gun violence in the US to facilitate **public health research**

Draw sample from local newspapers and television stations that publish online

Use machine learning and crowdsourcing to **extract structured data from text**

An engraving of the Mechanical Turk, the 18th century chess-playing automaton

Crowdsourcing and human computation are emerging fields that sit squarely at the intersection of economics and computer science. They examine how people can be used to solve complex tasks that are currently beyond the capabilities of artificial intelligence algorithms. Online marketplaces like [Mechanical Turk](#) and [CrowdFlower](#) provide an infrastructure that allows micropayments to be given to people in return for completing human intelligence tasks. This opens up previously unthinkable possibilities like people being used as function calls in software. We will investigate how crowdsourcing can be used for computer science applications like machine learning, next-generation interfaces, and data mining. Beyond these computer science aspects, we will also delve into topics like the sharing economy, prediction markets, how businesses can capitalize on collective intelligence, and the fundamental principles that underlie democracy and other group decision-making processes.

# How Many People Have Been Killed by Guns Since Newtown?

Slate partners with @GunDeaths for an interactive, crowdsourced tally of the toll firearms have taken since Dec. 14.

By Chris Korn and Dan Kohn

The answer to the simple question in that headline is absurdly hard to come by. So Slate is making that the first crowdfunding initiative. Our data is necessarily incomplete ([click here to contribute](#)), and to learn more about @GunDeaths, the Twitter user who helped us create this interactive, but the more people who are paying attention, the better the data will be. You can help to draw a more complete picture of gun violence in this country. If you know about a gun death in your community that isn't represented here, please email a link to a news report to [slate.dataportal@slate.com](#). And if you'd like to use this data in your own project, it's open. You can download it [here](#).

Update, Dec. 30, 2013: After [over 1,000 deaths](#), Slate is closing this project. The count is being picked up by Michael Kohn's Gun Violence Archive project, launching soon. Thank you to all who volunteered to make the data as comprehensive and accurate as possible.

HEALTH | VITAL SIGNS: CAUSE AND EFFECT

## VITAL SIGNS: CAUSE AND EFFECT; *Linking Guns and Gun Violence*

By ERIC NAGGERTY MAY 27, 2013

People with guns in their homes are almost twice as likely to be killed by guns as people who do not keep them at home, researchers reported yesterday in *The Annals of Emergency Medicine*.

And, the researchers found, people with guns are 16 times as likely to commit suicide using guns.

The explanation may lie in the unforgiving nature of firearms, said the author of the study, Dr. Douglas J. Wiebe, who conducted the research at the University of California at Los Angeles and is now at the University of Pennsylvania.

"People who are shot are substantially more likely to die than people injured with nongun weapons," Dr. Wiebe said.

The study was based on a review of the deaths of 1,720 homicide victims and 1,959 suicide victims and a sampling of American adults.

It found that most of the victims, over 56 percent, knew their assailants. A fifth of the homicides occurred during robberies, 6 percent during drug deals and about 15 percent during family arguments.

The study also found that women were significantly more likely than men to be victims of gun homicides. "This likely reflects the singular danger faced by women in abusive relationships," Dr. Wiebe wrote.

Perelman School of Medicine

# Congressman Who Restricted Gun Violence Research Has Regrets

H

The politics of gun control were as divisive in the 1990s as they are today. Republicans had won big in the '94 elections by campaigning against President Bill Clinton's gun control legislation. And in the spring of 1996, the National Rifle Association and its allies set their sights on the Centers for Disease Control and Prevention for funding increasingly assertive studies on firearms ownership and the effects on public health. The gun rights advocates claimed the research veered toward advocacy and covered such logical ground as to be effectively useless.

At first, the House tried to close down the CDC's entire, \$46 million National Center for Injury Prevention. When that failed, Dickey stepped in with an alternative: strip \$2.6 million that the agency had spent on gun studies that year. The money would eventually be re-appropriated for studies unrelated to guns. But the far more damaging inclusion was language that stated, "None of the funds made available for injury prevention and control at the Centers for Disease Control and Prevention may be used to advocate or promote gun control."

Dickey proclaimed victory — an end, he said at the time, to the CDC's attempts "to raise emotional sympathy" around gun violence. But the agency spent the subsequent years petrified of doing *any* research on gun violence, making the costs of the amendment clear even to Dickey himself.

# Congressman Who Restricted Gun Violence Research Has Regrets

"Compared to five years ago, the funding picture for a few of us who have done this work for a long time is rosy," Wintemute said. "Compared to what it requires, it is still bleak. We have lost 20 years of concentrated effort."

Others have found the field fairly difficult to traverse. Dr. Douglas Wiebe, an associate professor of epidemiology at the Perelman School of Medicine at the University of Pennsylvania, worked on [a 2009 study](#) on the link between gun possession and gun assault that is believed to have sparked Congress' interest in applying the Dickey amendment to the NIH. He called the restriction of funds "not fatal" to his field, "but very close to it." Investigators, he explained, are being forced toward less-politically contentious studies, which makes it close to impossible to conduct sound epidemiological research.

# Want to answer questions like

Gun control – a Guardian investigation

America's gun problem is so much bigger than mass shootings

## Too much emphasis on mass shootings has a cost

How many deaths result from mass shootings compared to other gun crimes? How has this changed over time?

America's gun control debate continues to revolve around the exact circumstances of the shooting that is currently on the news. Is a new gun law worth it, or not? That depends on whether it might have prevented this particular shooting. While this is an understandable, human response, it is a terrible way to go about saving lives.

The shock and horror that follows mass shootings has led to a obsessive focus on the dangers of military-style rifles – even though rifles of any kind were used in less than 3% of gun murders in 2014, according to FBI data.

A tunnel focus on mass shootings has also fueled the public

# Want to answer questions like

THE UPSHOT | The Science Behind Suicide Contagion

PUBLICITY AND PUBLIC HEALTH

## The Science Behind Suicide Contagion

Margot Sanger-Katz @sangerkatz AUG. 13, 2014

When Marilyn Monroe died in August 1962, with the cause listed as probable suicide, the nation reacted. In the month that followed, there was extensive news coverage, widespread sorrow and even suicides. According to one study, the suicide rate in the United States [jumped by 12 percent](#) compared with the same month the previous year.

Mental illness is not a communicable disease, but there is a growing body of evidence that [suicide is still contagious](#). Publicized suicides have been repeatedly and definitively linked to an increase in suicide, especially among young people. Analysis suggests that at least 5 percent of youth suicides are influenced by contagion.

How strong is the effect of suicide contagion? Does it change with age, gender? Is it effected by the style of reporting?

# Want to answer questions like

The screenshot shows a dark-themed podcast player interface. In the top left corner is the 'ON THE MEDIA' logo. To its right, the text 'Published in On The Media'. Below this is the title 'Racial Bias in Crime Reporting'. Underneath the title are three buttons: a blue 'Listen 4 min' button, a grey '+ Queue' button, and a grey '...' button. To the right of these are three social media sharing icons: Facebook, Twitter, and Email. The overall design is clean and modern.

GUN REPORT

## The Gun Report: May 30, 2014

MAY 30, 2014 3:32 PM ▾ 314 Comments

The Kalashnikov family of assault rifles. Alexander Vasilev/Wikimedia Commons

Recent shootings involving children have rocked two American cities.

Michael Day, 13, died after being caught in the crossfire between two groups in the Edison Neighborhood of Kalamazoo, Mich., on Memorial Day. This wasn't even the first time Day had been a victim of gun violence: On April 6, he was shot in the back while leaving a party. He told police he was walking when he heard a gunshot and realized he had been hit.

Victor Manuel Garay, 15, has been accused of firing the shot that killed Day. Police had been called earlier in the day to break up the large brawl, but as soon as they left, the fighting continued. If charged as an adult, Garay could face life in prison without the possibility of parole.

--

Jennifer Mascia described how she wrote the Gun Report in an NPR interview

JENNIFER MASCIA: Well, I would google “**shooting**,” “**man shot**,” “**woman shot**,” “**child shot**,” “**teen shot**” and “**accidentally shot**”. You know, this was all day one coverage of shootings, so a lot of times the details aren't flushed out. If there was no name and scant details, I had to skip over those. So each day, there'd be about 35 to 40 shootings that I would present.

## Work on tasks

Read more about our tasks and select how you want to contribute.

### Extract information

We want data that is easy for researchers to search and study. We need your help reading articles about gun violence and extracting key pieces of information (such as the location of the shooting or the name and age of the victim).

Total submitted tasks: 15528

Total available tasks: 5341

[Go to task](#)

### Scan the Headlines

Read headlines and tell us which ones describe incidents of gun violence.

Total submitted tasks: 5408

Total available tasks: 862

## Police: Officer shoots, wounds shoplifting suspect outside Conroe Wal-Mart - Houston Chronicle

Conroe police say an officer shot and wounded a suspected shoplifter in the parking lot of a Wal-Mart store Monday - the second officer-related shooting of someone suspected of taking merchandise from a city Wal-Mart store in less than three years. According to investigators, Fillmore was observed concealing several items of merchandise and then leaving the store when a Wal-Mart employee attempted to stop him. A Conroe police officer who responded to the incident feared for the safety of the Wal-Mart employee and other citizens in the busy parking lot and fired one shot, wounding the suspect in his left shoulder. Fillmore has convictions dating to 1977 for various offenses including home burglaries, thefts and illegal drug possession, public records show.

First answer a series of binary questions about the circumstances of the shooting....

Please read the text carefully, and then select an answer for all questions. Please base your answers only on information that is explicitly stated or can be confidently inferred from the text of the article.

The shooting was unintentional.

Yes  No  Not Mentioned

The shooting was by a police officer.

Yes  No  Not Mentioned

The shooting was directed at a police officer.

Yes  No  Not Mentioned

The firearm was stolen.

## Man shot in North Baltimore and checks himself into hospital

A 32-year-old man was shot in North Baltimore and checked himself into a hospital Wednesday evening, police said. Detectives determined the man was shot on the 4600 block of Midwood Ave. in the Winston-Govans neighborhood, police said. Officers had been called to the scene but did not release the man's condition. Anyone with information can call 396-2221.

## **Chicago Police release Laquan McDonald shooting video | National News**

Three seconds. On a dashcam video clock, that's the amount of time between the moment when two officers have their guns drawn and the point when Laquan McDonald falls to the ground. The video, released to the public for the first time late Tuesday, is a key piece of evidence in a case that's sparked protests in Chicago and has landed an officer behind bars. The 17-year-old McDonald was shot 16 times on that day the video shows in October 2014. Chicago police Officer Jason Van Dyke was charged Tuesday with first-degree murder....

### Police Identify Suspect In Memphis Officer's Killing

CRAWLED DATE: 8/3/2015

Police in Memphis identified a 29-year-old convicted bank robber as the man who allegedly killed a city cop during a traffic stop on Saturday. Police director Toney Armstrong on Sunday evening told reporters that officer Sean Bolton apparently interrupted a drug deal and that after "some type of physical altercation," Bolton was shot and killed by a passenger in the car. Armstrong said police were searching for 29-year-old Tremaine Wilbourn and had issued a warrant for his arrest. Wilbourn had been free on supervised release by the U.S. Western
